What & How	

## Intersect Milestone Acceptance Form

Within the framework and in alignment with the core values of a Member Based Organization, and with the objective of raising awareness around Cardano governance, Intersect participated institutionally in the "AZTECA" event held in Mexico. The organization actively engaged in activities, contributed to discussions, and provided valuable insights into the functioning of the Cardano ecosystem.

The two-day event brought together students from a range of universities, with participation from the faculties of Law, Economics, and Engineering. It took place at the University of Tlaxcala on May 27 and at the Puebla Convention Center on May 29, attracting over 200 participants.

With more than 12 hours of content across both days, the event offered a diverse program that included panels and individual presentations. Input Output Global (IOG) was also present, contributing through talks and active engagement in the sessions.

Topics covered included the technical specifications of the Cardano network, consensus mechanisms, real-world use cases, practical applications, and regional initiatives. In addition, the IOG Education team and SPO Jaime Posadas led hands-on workshops focused on teaching participants how to operate a Cardano node.

It was undoubtedly a remarkable event that garnered both local and international attention. This initiative marks an important milestone that highlights the value of consistent global outreach and engagement.

Given the significance and reach of the event, and thanks to the ongoing participation of Latin American community members in global initiatives, the monthly Cardano Town Hall featured a dynamic multilingual segment with contributions in both Spanish and Portuguese. Participants from around the world shared their insights and experiences from events such as "AZTECA" in Mexico, the Bitcoin Conference in Las Vegas, and Money 20/20 in Amsterdam, including prominent voices from communities born and rooted in Latin America.

## Intersect Milestone Acceptance Form

In alignment with the core values of a Member-Based Organization and with the objective of raising awareness around Cardano governance, Intersect participated institutionally in the "AZTECA" event held in Mexico. The organization played an active role throughout the program, contributing to key discussions and providing valuable insights into the functioning of the Cardano ecosystem.

The two-day event brought together students from a range of universities, particularly from the faculties of Law, Economics, and Engineering. It took place at the University of Tlaxcala on May 27 and at the Puebla Convention Center on May 29, drawing an audience of more than 200 participants.

As part of its outreach efforts, Intersect facilitated the professional translation and adaptation of several content slides from English to Spanish. This ensured that global materials were effectively localized to engage the target audience in their native language.

With over 12 hours of programming, the event featured a diverse agenda that included both panel discussions and individual presentations. Input Output Global (IOG) also participated, contributing through expert talks and active involvement in multiple sessions.

Topics covered included the technical architecture of the Cardano network, consensus mechanisms, real-world use cases, practical applications, and regional initiatives. Additionally, the IOG Education team and Stake Pool Operator Jaime Posadas led hands-on workshops designed to teach participants how to operate a Cardano node.

This event was a significant milestone that drew both local and international attention, reinforcing the value of ongoing global outreach and community engagement.

Recognizing its relevance and reach, the monthly Cardano Town Hall featured a multilingual segment inspired by this and other recent initiatives. Contributions in both Spanish and Portuguese highlighted insights from AZTECA in Mexico, the Bitcoin Conference in Las Vegas, and Money 20/20 in Amsterdam. These reflections prominently showcased voices from communities with strong roots in Latin America.

### Milestone Acceptance Form Guidance:

*Accepted By* - this should be the person responsible for completing the Quality or Testing review, the person of suitable expertise to attest that the milestone has been completed. It should not be a person from the delivering organization.

*Communication* - the cardano ecosystem thrives due to open participation and membership. Intersect will announce deliverables and celebrate the success of its partners. Please provide a few words on how we can best articulate and share this milestone being completed.
